Additional Notes * - All Bulls come with a Guarantee

Lot 13 – Morphology fail. Will be retested before the sale

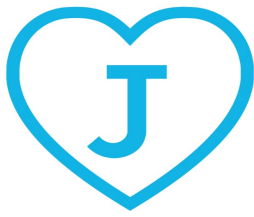

Lot 16 - Qualified pass for physical based on swollen hocks (bursitis). Moderate on the left, mild on the right.

Lot 17- Developed a submandibular abscess after his VBBSE. This has been treated. He still has a swelling from the abscess capsule that should recede gradually. Occasionally some scar tissue will remain.

Lot 18 – Morphology fail at 55% normal. Proximal droplets are above threshold at 23% (need to be <20%). Generally, this is due to maturity. He will be retested and offered for sale with a fertility guarantee.

Lot 19 - Qualified pass on morphology at 58%. See VBBSE certificate for details

Lot 33 – Qualified pass on physical with an interdigital fibroma developing on the near side hind foot, not experiencing discomfort or lameness.
